OUTLOOK:

A cold, dry northwest flow aloft will bring much cooler temperatures to the Northern Rockies Area with little chance of moisture. Temperatures will be 50 to 65 across the region, except mid 70s in central Idaho. Minimum relative humidity will be 30 to 45 percent with west winds at 5 to 15 mph, except northwest at 15 to 25 across eastern Montana and North Dakota.

Upper level high pressure along the pacific coast will result in a dry northwest flow over the Eastern Great Basin Area, bringing sunny conditions to the region. Temperatures will be in the upper 60s to lower 80s over southern Idaho, 70s and 80s over Utah, except 90s in southwest Utah. Minimum relative humidity will be 10 to 22 percent in Idaho and 6 to 18 percent in Utah with winds west to northwest at 10 to 20 mph.

High pressure aloft will continue over the Northern California Area, bringing sunny and warm conditions to the region. Temperatures will be in the 60s along the coast and mid 80s to 102 inland with minimum relative humidity at 12 to 19 percent. Winds will be southwest to northwest at 6 to 14 mph.

Remains of tropical storm Juliette will continue to bring moisture to the Southern California Area. Temperatures will be in the 80s to mid 90s in the mountains, 95 to 105 in the valleys and northern deserts and 97 to 105 in the southern and eastern deserts. Minimum relative humidity will be 10 to 20 percent in the mountains and deserts, with 20 to 30 percent in the valleys. Winds will be northwest to northeast at 5 to 15 mph in the morning, switching to southwest to west in the afternoon.
